DETAILED ACTION

Election/Restrictions

1. Newly submitted claims 19-33 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Newly submitted claims 19-28 are directed to a patentably distinct species from the previously presented claims. The species are independent or distinct because they contain mutually exclusive subject matter, such as "wherein an amount of said ink not having color material nor black material that is discharged is determined according to an amount of said ink having color material that is discharged." Also, newly submitted claims 29-33 and the previously presented claims are related as product and process of use. The process for using the product as claimed can be practiced with another materially different product, such as one that does not have the first and second nozzle rows misaligned in a sub-scanning direction.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 19-33 withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Response to Amendment

2. The reply filed on 4/25/07 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): All of the claims have been cancelled or withdrawn from consideration. See 37 CFR 1.111. Since the above-mentioned reply
